

제 54회 SOMATIC BALLET® PEDAGOGY WORKSHOP

Date: August 28 (Sun.), 2022, 9:00 AM

Place: Studio 1(#62201), SungKyunKwan University

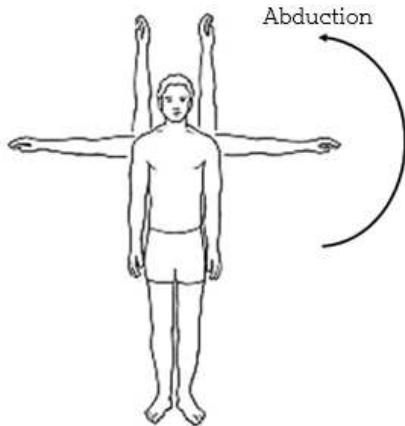

Theme: Dance with the Arms

Goal: Somatic Embodiment of ‘Port de Bras’ to express our emotions

Contents:

1. Movements in the Shoulder Joint^{*1}

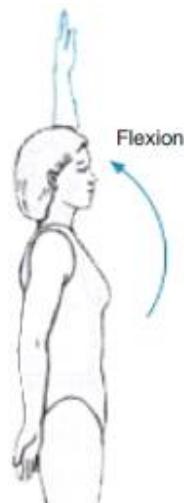

① Abduction: from en bas to en haut through à la seconde

* Involved muscles

: supraspinatus, deltoid, serratus anterior,
coracobrachialis, &...

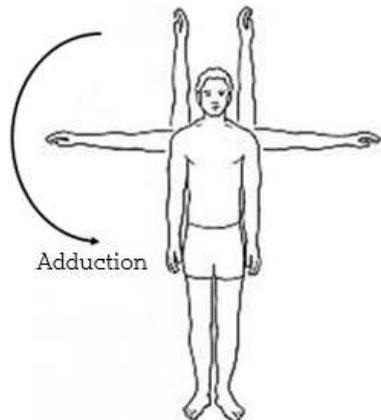

② Flexion: from en bas to en haut through en avant

* Involved muscles

: anterior deltoid, pectoralis major,
coracobrachialis, serratus anterior, &...

③ Adduction: from en haut to en bas through à la seconde

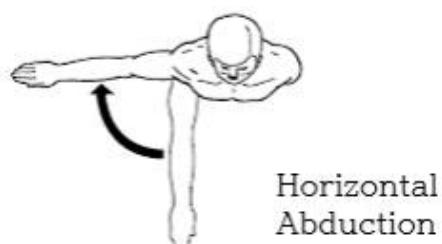

* Involved muscles
: latissimus dorsi, teres major,
pectoralis major, coracobrachialis,
triceps, &...

④ Extension: arms to the back low

* Involved muscles
: latissimus dorsi, teres major and minor,
deltoid(posterior), triceps, &...

⑤ Horizontal Abduction

Horizontal
Abduction

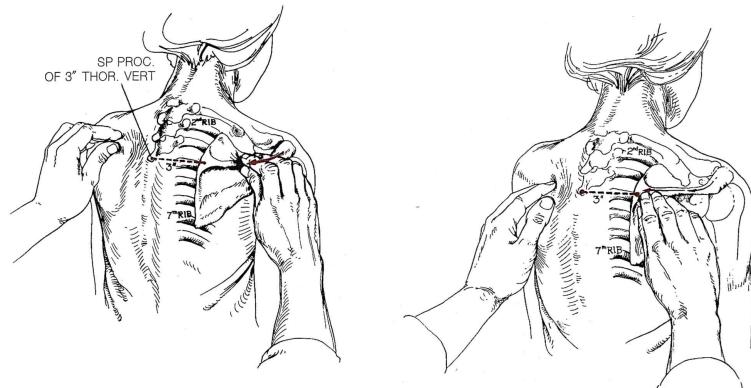

⑥ Horizontal Adduction

Horizontal
Adduction

2. Stability and Mobility of the Scapular

① Where is the Scapular located?^{*2}

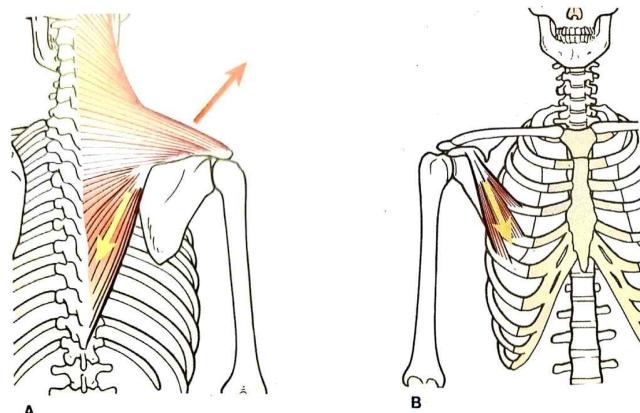

<견갑골은 두 번째 늑골부터 일곱 번째 늑골 위에 자리잡고 있으며, 견갑극은 세 번째 흉추 극돌기로부터 약 2~3 inch(5cm) 떨어진 반대편에 있다.>

② Scapular 'X'^{*3}

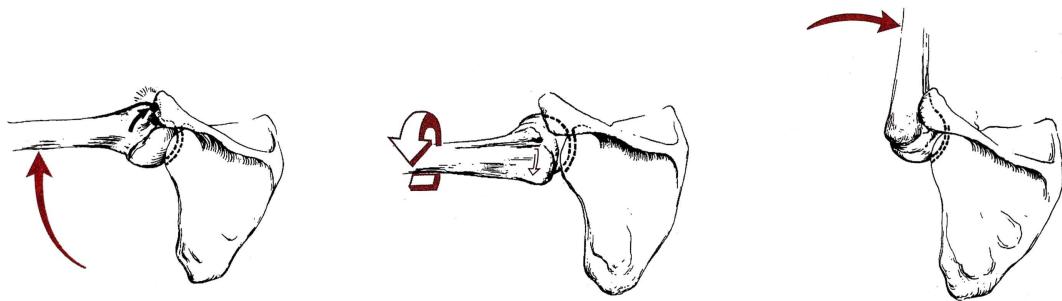

<rhomboid(능형근)와 serratus anterior(전거근)에 의해 형성된 'X'의 한 측>

<lower trapezius(승모근의 아래부분)와 pectoralis minor(소흉근)에 의해 형성된 'X'의 또 다른 한 측>

Note:^{*2}

- 팔이 약 20-30°(demi à la seconde) 외전할 때까지 견갑골은 움직이지 않는다.
- 팔이 약 120°까지 올라가게 되면 ‘humerus surgical neck’가 ‘acromion’에 부딪히게 된다. 그렇기 때문에 팔을 약 90°정도 올렸을 때, 어깨 관절을 외회전하여야 팔을 180°까지 올릴 수 있게 된다.

제 55회 SOMATIC BALLET® PEDAGOGY WORKSHOP

On-line (Recorded)

Theme: History of Somatic Movement Education
(Third Generation - The Amalgams)

Goal: Understanding of Somatic Movement Education and
Therapy Today: A Growing Field

Contents:

- Gyrotonic
- Pilates Contrology
- NIA (Neuromuscular Integrative Aerobics)
- Dynamic Embodiment
- Franklin Method
- Global Somatics
- SomaSoul
- Somatic Expression
- Institute for Somatic Movement Studies (ISMS)
- Vocal Movement Integration (VMI)
- International Somatic Movement Education Therapy Association
(ISMETA)
